🪅 FlashInfer Trace

💻 Definition

```
1  name: string
2  op_type: string
3  axes: object
4  inputs: object
5  outputs: object
6  reference: string
7  tags?: array
8  description?: string
9  constraints?: array
```

⚙️ Workload

```
1  uuid: string
2  axes: object
3  inputs: object
```

💡 Solution

```
1  name: string
2  definition: string
3  author: string
4  spec: arrary
5  sources: array
6  description?: string
```

⏱️ Evaluation

```
1  status: enum
2  environment: object
3  timestamp: string
4  log: string
5  correctness: object
6  performance: object
```
